

I'm not robot!

Selenium is one of the automation testing tools which is an open-source tool. Selenium automates web application. Testing performed by software testers using the Selenium testing tool is known as Selenium Testing. In this Free Selenium training tutorial, we cover all Selenium concepts (basic selenium test scripts to the advanced testing framework) in detail with easy to understand practical examples. This Selenium Tutorial is helpful for beginners to advanced level users who want to learn selenium or learn automation. Selenium Software is a suite of software (IDE, RC, WebDriver) that serves various Selenium QA testing needs. Selenium 4 Tutorial - FAQs Why This Selenium WebDriver Tutorial? In this Selenium Web Driver Tutorial, you will learn how to work with the selenium to create automated test scripts (selenium scripts) for any Web Browser applications and how to create your own framework. What are the prerequisites? Learn - Java for beginners Who is the targeted audience of this Selenium Tutorial? Software Testers, QA Engineers Selenium 4 Tutorial - Table of Contents If you are an experienced selenium tester, check out the latest features of Selenium 4 Alpha release SELENIUM BASICS SELENIUM WEBDRIVER TESTING TestNG Installation TestNG Complete Tutorial REPORTS CROSS BROWSER TESTING MOBILE TESTING Mobile Testing Platform with Real Devices AUTOMATION FRAMEWORKS API Testing Learn API Testing Postman Tutorial (API Testing with Postman) INTERVIEW QUESTION SAMPLE RESUME Please feel free to share this Selenium Tutorial to help as many people as possible! If you found that we missed out on any selenium automation topics, please let us know in the comments section below. We will include those Selenium concepts in our Free Selenium WebDriver Tutorial. You could also explore more about Selenium on its official website. If you want to learn Selenium online, you can contact us for Selenium Online Training. Related Tutorials: Selenium is one of the most widely used open-source Web UI automation testing tools. It supports the automation of websites across different browsers, platforms, and programming languages. Our Selenium tutorial is designed specifically for beginners with little to no prior knowledge of Selenium or automation testing. We will start with the basics of Selenium. After that, we will move to the more advanced stuff like multi-browser testing, running tests in parallel, automation frameworks, etc. Selenium Tutorial for Beginners This section covers the introduction and setup part of the Selenium tutorial. In addition, it covers the usage of basic Selenium commands. You will be using these commands during the automation of web-based applications. Chapter#1 - Selenium Introduction Introduction to Selenium, its different components, advantages, and limitations. Chapter#2 - Selenium WebDriver Architecture Explained A detailed explanation of the Selenium WebDriver architecture and its different components. Chapter#3 - Selenium WebDriver Setup Java, Eclipse, and WebDriver set up with a sample script for validation. Chapter#4 - Launching Browsers in Selenium Commands and sample scripts to launch different browsers. Chapter#5 - Finding web elements in Selenium Locate web elements in Selenium using Firebug or Chrome Developer tool. Chapter#6 - Selenium WebDriver Basic Commands Some of the most commonly used WebDriver commands and their usage. Chapter#7 - Waits in Selenium Learn about waits in Selenium for synchronizing the different user actions. Selenium Tutorial Promo - ArtOfTesting CSS and XPath Locator Tutorial For effectively working with different elements, especially the dynamic elements, one should know how to create complex element locators. In the below two tutorials, we will study the CSS and XPath locators. These will immensely help us in creating locators for complex web elements. Chapter#8 - CSS Locators [Must Read] Learn how to locate elements using their CSS (Cascading Style Sheets) Chapter#9 - XPath Locators [Must Read] Learn how to locate elements using XPath (XML path) Selenium WebDriver with Java Tutorial The below tutorials will help you with code snippets and examples. These will include some of the most commonly performed actions in test automation. Here, we are using Java language with Selenium. If you have no prior experience in Java then you can learn the basics of Java from our Java for Testers series. Chapter#10 - Handling Dropdowns in Selenium Learn how to interact with dropdown elements. Chapter#11 - Right Click in Selenium Learn how to simulate mouse right-click action. Chapter#12 - Double Click in Selenium Learn how to simulate mouse double-click action. Chapter#13 - Mouse hover in Selenium Learn how to simulate mouse hover action. Chapter#14 - Drag and Drop in Selenium Drag and Drop web elements using Actions class in Selenium. Chapter#15 - Handling Alerts in Selenium Accept - Dismiss alerts or pop-ups in Selenium. Chapter#16 - Press ENTER, Function and other non-text keys Simulate keyboard keypress events for non-text keys like Enter, Ctrl, Alt, etc. Chapter#17 - Scroll a Webpage in Selenium Learn how to scroll up and down to a coordinate or specific element in Selenium. Chapter#18 - Refresh a webpage in Selenium Learn all the ways to refresh a web page in Selenium [5 different ways] Chapter#19 - Maximize and minimize the Browser Selenium commands to maximize and minimize the browser window. Chapter#20 - Resize the browser window Learn the resizing of the browser window in Selenium WebDriver. Chapter#21 - Navigate Back and Forward in the Browser history Navigate back and forward using driver.navigate() command. Chapter#22 - Keyboard Interactions in Selenium Learn about KeyDown, KeyUp, and sendKeys commands. Chapter#23 - Mouse Interactions in Selenium Learn about different mouse interaction commands along with code snippets. Chapter#24 - Executing JavaScript Code in Selenium Learn how to execute javascript code in Selenium along with a code snippet. Selenium With TestNG Tutorial Selenium is just an automation tool. In order to make validations, pass-fail a test case, create test reports, etc. we need a testing framework. In the below tutorials, we will study one such framework/library - TestNG. Chapter#25 - TestNG Introduction What is TestNG? What are its different features? Chapter#26 - Selenium WebDriver with TestNG Sample Script Creating a basic test in Selenium with TestNG. Chapter#27 - TestNG Annotations Annotations are basically the tags using which TestNG provides different features. Chapter#28 - Data-Driven Testing in TestNG Framework in which the test data drives the automation tests. Chapter#29 - Running Tests in Parallel using TestNG Reduces the overall test execution time. Chapter#30 - Multi-browser testing using TestNG Sample script to run tests with different browsers. Chapter#31 - Rerun failed tests TestNG configuration and sample script to retry the failed tests. Chapter#32 - Set Test priority in TestNG Prioritizing the test cases or setting the order of test case execution. Chapter#33 - Dependency in TestNG Makes execution of one test case dependent on another. Chapter#34 - Soft Assertion in TestNG To continue code script execution even after assertion statement failure. Chapter#35 - Timeouts in TestNG Used in scenarios that need to be failed if not completed in a defined time. Selenium Framework Here, we will study some of the widely used automation frameworks and design patterns along with sample scripts for their implementations. Chapter#36 - Data-Driven Framework A data-driven framework using Selenium and TestNG. Chapter#37 - Page Object Model An automation design pattern that helps in creating maintainable test suites. Chapter#38 - Page Factory One of the implementations of the Page Object Model (POM) provided by Selenium. Chapter#39 - Complete Selenium with Java Framework End-to-end Selenium with Java Hybrid framework with sample test script and Github link. Other Selenium Tutorials Selenium Interview Questions Database Automation Tutorials FAQs What is Selenium? Selenium is an open-source and free test automation tool. With the help of it, we can automate web-based applications. Can I learn Selenium on my own? Yes. If you have basic programming knowledge then you can learn Selenium on your own. Just start from chapter-1 of our course. Our course is completely free and designed for complete beginners. Can I learn Selenium without knowing Java? In order to learn Selenium learn Selenium? You can learn basic website automation in a couple of days only. But for complete Selenium features and test automation framework knowledge. It will take you about 2-3 weeks of consistent study and practice. Selenium with Java Training For online Selenium with Java training, check - Selenium Training. We provide instructor-led live online training. In this training, we will cover the different tools and concepts that are required for creating a test automation suite. This will include - Core Java, Selenium WebDriver, TestNG, Maven, Git, Jenkins, etc. Kuldeep is the founder and lead author of ArtOfTesting. He is skilled in test automation, performance testing, big data, and CI-CD. He brings his decade of experience to his current role where he is dedicated to educating the QA professionals. You can connect with him on LinkedIn.
